

In business for people.

Unit4 is a leading provider of enterprise applications empowering people in service organizations. With annual revenue of 500M Euro and more than 4000 employees world-wide, Unit4 delivers ERP, industry-focused and best-in-class applications. Thousands of organizations from sectors including professional services, education, public services, not-for-profit, real estate, wholesale, and financial services benefit from Unit4 solutions. Unit4 is in business for people.

### **Our vision**

Our vision is to deliver self-driving enterprise applications through our unique design approach that empowers people in services and government organizations around the world. We are supporting a new generation of workers to work smarter, faster and more collectively than ever before. The Unit4 People Platform serves as the foundation for the Unit4 suite of products and brings enterprise applications and ERP into the digital age through advances in social, mobile, analytics and cloud technology. We are moving towards self-driving, intelligent enterprise applications designed specifically for services organizations and their people.

### **Job details**

As a **Front-end Developer**, you can translate an interface, designed by visual, interface and interaction designers, to HTML5, CSS3 and JavaScript. You bridge the gap between visual design and development, and you need to be an all-round Front-end Developer with technical knowledge, innovative skills and an eye for visual design.

You are a part of our UNIT4 Design Center, headquartered in Utrecht, the Netherlands. You will cooperate closely with the visual, interface and interaction designers located in Utrecht, but your day-to-day work will be as a part of a software development Product Domain where you and an Interface Designer will be responsible for conducting good design, on-site. You will be a hands-on collaborative team member in the teams, and work closely with all development teams and other domain resources within your product domain.

As a Front-end Developer in UNIT4 R&D a thorough knowledge and experience with HTML, CSS, JavaScript and web standards is essential. In addition you need to have a good sense of design, and have a creative and team-oriented mind-set.

You are looking for a challenge with great potential of learning and development within your area of expertise, as well as enjoying the experiences of working with different development centers across Europe and be exposed to different cultures.

### **Key tasks and responsibilities:**

- Translating graphical end interaction designs to excellent performing interfaces;
- Develop fully functional (mobile) web applications, using CSS, HTML and JavaScript;
- Testing in several browsers/(mobile)devices;

- Pro-active thinking and working closely together with both Designers and Developers about building (mobile) web applications in an agile environment;
- Writing programmable code without the use of WYSIWYG editors;
- Writing semantic code, in preparation for dynamic content of (mobile) web applications.

### **Job requirements**

#### **Knowledge and skills:**

- Knowledge of Sencha or other JavaScript frameworks (e.g. Angular) preferred;
- Excellent English communication skills, both written and verbal;
- Good sense of usability, as well as quality driven and pixel-perfect;
- Flexible, and with strong problem solving skills;
- You are accurate, creative and committed to excellence;
- You have good communication skills and you have the ability to team up with both Design and Development;
- You are curious and have a natural tendency to stay up to date on your field of expertise

#### **Education**

Bachelor's or Master's degree in Graphic Design, User Experience, Multimedia or related field.

#### **Experience**

- Minimum of 3 years' experience with HTML/CSS, JavaScript and Photoshop;
- Proven experience in developing websites and / or web applications;
- Programming validated, cross-browser and cross-platform code; experienced with Front-end Development for mobile devices;
- Experience with Front-end Development for ERP and other Business Software preferred;
- Experience with or background in a usability – focused environment;
- Experience with Visual Studio .NET is beneficial in this position;
- Agile/lean experience preferred;

#### **Personality**

You are always looking for great designs and making them pixel-perfect. You are able to work with other team members but are also able to work individually. You are always striving to become better and have a high degree of initiative and continuously looking for the best user experience for the customer.
