

In business for people.

Unit4 is a leading provider of enterprise applications empowering people in service organizations. With annual revenue of 500M Euro and more than 4000 employees world-wide, Unit4 delivers ERP, industry-focused and best-in-class applications. Thousands of organizations from sectors including professional services, education, public services, not-for-profit, real estate, wholesale, and financial services benefit from Unit4 solutions. Unit4 is in business for people.

Our vision

Our vision is to deliver self-driving enterprise applications through our unique design approach that empowers people in services and government organizations around the world. We are supporting a new generation of workers to work smarter, faster and more collectively than ever before. The Unit4 People Platform serves as the foundation for the Unit4 suite of products and brings enterprise applications and ERP into the digital age through advances in social, mobile, analytics and cloud technology. We are moving towards self-driving, intelligent enterprise applications designed specifically for services organizations and their people.

Job details

As a **User Interface Designer** you are responsible for ensuring that the user experience is seamless, intuitive, functional and industry leading. You will liaise with Product Managers and System Designers to translate user stories and acceptance requirements into solid designs and assist both Software Engineers and Test Analysts with interpreting and implementing the design and understanding user needs.

Key tasks and responsibilities:

- Create the right User Interface for the user in the right way by building high fidelity prototypes and UI, mapping user interactions and iteratively validating with users, in partnership with Product Management and System Designers.
- Measure effectiveness of UI design by collecting and analyzing usage data and using this information to further improve the UI and next generation of design concepts.
- Validate user stories and designs by conducting user and design research including usability studies, ethnographic field research, user surveys, and prototype testing and staying abreast of the latest industry and design trends.

- Make others great by effectively and iteratively communicating UI priorities and user requirements. Be the internal voice of the user for the Development Team.

Job requirements

Knowledge and skills

- Proven experience in creating user interfaces for websites and/or web applications;
- Able to think in strategies and concepts;
- Excellent problem-solving skills;
- Excellent communication skills;
- Excellent English communication skills, both written and verbal;
- In-depth knowledge in the field of usability;
- Knowledge in the field of anthropology, (cognitive), ergonomic, psychology and/or philosophy is preferred.

Education

Bachelor's Degree in Computer Science or related field (User Experience, Multimedia Design, advanced degree preferred).

Experience

- 3 or more years' experience as Interaction-, Interface,- or UX designer across a variety of devices: desktop, smartphone, tablets;
- Experience with usability studies using eye-tracking hardware and software;
- Experience in teaming up with strategy, visual design and front end development.
- Agile/lean work experience is preferred.

Personal Characteristics

You are creative and motivated by the search to improve the user experience. You work well with others or by yourself and are always driven to become better. You have a high degree of initiative and always looking for the best solution for the user.
